25X1A

MEMORANDUM FOR: Chief, Human Resources Division, OC

25X1A

FROM [REDACTED]

SUBJECT [REDACTED]

1. (C) While at first blush the OSO proposal for the exchange of our space in [REDACTED] appeared to be advantageous and from a purely space point of view, it would be. However, from a utilitarian point of view particularly in the near time frame, we cannot see how we could put that space to use for classrooms or for other instructional purposes.

25X1A

2. (C) It would not be cost effective for example to move the radio field stations [REDACTED] and there is no space [REDACTED]; nor would it be convenient from an administrative point of view. This coupled with COMSEC's fear of RF interference with their programs would place unacceptable constraints on our training program scheduling should their fears be founded.

25X1A

3. (U) The use [REDACTED] for relocating the video production portion of the Media Center from a purely space point of view, again, would be satisfactory. However, when weighed against the resultant further fragmentation of the Media Center activities and its staff would be inefficient and place a further strain on our resources.

4. (U) For the present and near future, we believe that the exchange of [REDACTED] only would be to our advantage and would not place any impact requiring additional funds or other resources.
